## BOIL WATER ADVISORY

CUSTOMERS OF THE TOWN OF BLACKSBURG

January 23, 2026

The Town of Blacksburg is advising customers located in the areas listed below to **vigorously boil their water for at least one (1) full minute** prior to drinking or cooking. If water is used for drinking, allow the water to cool to a desired temperature after boiling.

**Any ice made from water that has not been boiled should not be used for drinking purposes during this advisory.**

### Affected Areas

*All areas located in the following portions of the Blacksburg Water System: South of I-85 between the intersection of W. Pine St. & W. Cherokee St and Hwy5 (downtown and adjacent streets)*

### Reason for Advisory

An interruption of water service occurred in the affected area. While there is **no confirmed contamination** of the water system, the loss of water pressure creates the **potential for contamination**. As a precautionary measure, residents should boil water for at least one (1) full minute prior to drinking, cooking, brushing teeth, etc., until further notice from the Town.

### What's Being Done

The interruption of service has been repaired. Town crews are conducting required testing to ensure water quality meets all regulatory standards.

### Repeal of Advisory

The conditions of this **Boil Water Advisory** should be followed until the Town of Blacksburg issues an official **Repeal Notice**. The repeal will be communicated in the same manner as this advisory.

The Town anticipates providing an update by **January 25, 2026** pending water quality test results.

The Town of Blacksburg apologizes for any inconvenience this may cause.
